

ENVIRONMENTAL POLICY

PECOL AUTOMOTIVE S.A., PECOL group company, has as main objective to guarantee a competitive, efficient and quality service, integrating for such in the strategy of its development the components of safety and environment, in the way for the total quality and within the principles of the sustainable development.

The administration is focused in guaranteeing the fulfillment of this objective and in developing its activities involving all the interested parties together with all the collaborators of the organization, in the clear respect for the environmental values.

- ✓ Environmental protection through the prevention of pollution, minimizing the most relevant environmental impacts that the activity may generate both in normal and emergency situations;
- ✓ Continuous review of environmental performance in order to promote continuous improvement;
- ✓ To ensure all legal and other requirements that the organization voluntarily subscribes to are met;
- ✓ To promote the application of more sustainable procedures and processes, namely in aspects related to the consumption of resources, specifically water, energy and waste production, meeting the protection of the environment;
- ✓ Actively involving all employees through the development of skills and awareness of the environmental impacts arising from their activities.

This policy is achieved through the individual involvement of each employee and teamwork in defining, reviewing, approving and implementing the objectives and targets to be met.
